

Internship Information | *Early Childhood Education*

What to know about the Early Childhood Education Internship Courses:

- The Early Childhood Education Internships (EDUC 631 and EDUC 632) must be taken in order. EDUC 631 needs to be completed before starting EDUC 632.
- Most, if not all, coursework should be completed before starting the internships.
- The Early Childhood Education Internships are completely Canvas based. There will be no placement or mentor required for this internship. (No verification form is required.)
- Students will enroll in two separate internship courses in two separate six week sessions. Each internship will consist of weekly discussion boards and assignments through Canvas.
- **Please note that the internships are all 2 credits. If you are receiving financial aid it will not kick in until second session if you are not enrolled for at least 4 credits first session (for example – if for session 1 you are only taking the 2 credit internship then you will have to pay out of pocket for those two credits until the beginning of the second session then your financial aid will be released and you will be “reimbursed” for those 2 credits for the first session and then given the rest of your aid at that time.)*
