Strategies used & why: (Purpose)

* Has your method of reading...
I went back to stuff I didn't
understand & re-read.

• asked questions

• underline important stuff

2) Nope, I still underline &
go back & reread because
it's easy for me.

There are no magic bullets: The small number of correlations found in the study indicate the poverty of simplistic solutions. Throwing money at education by itself rarely produces results, and individual changes to education systems, however sensible, do not work too much on their own. Education requires long-term, coherent and focused system attention to achieve improvement.

Respect teachers: Good teachers are essential to high-quality education. Finding and training them is not necessarily a question of high pay. Instead, teachers need to be treated as the valuable professionals they are.
